SHADES RFP

Description

A custom-built AI-powered Request for Proposal (RFP) management system designed to automate the ingestion, parsing, and summarization of proposal documents. Leveraging large language models via Ollama, the platform streamlines proposal analysis, enhances response accuracy, and significantly improves operational efficiency and turnaround time.

Tech-stack

REACT.js, MongoDB, Tailwind CSS

SHADES · RFP WORKSPACE

Stay on top of your RFPs.

Upload RFP documents, collaborate with your team, and use AI to summarise, ask questions, and check compliance all in one place.

- Cap_IT_Specs_AR_Solutions_Bid.pdf ▾SummaryQuestionsCompliance

Summary

Cap IT Specs proposes developing a customized AR recruitment suite for Hakx Corp, encompassing AR job role visualizations, gamified assessments, virtual workplace tours, and analytics tools. The solution is designed for deployment on mobile devices, AR headsets, or web-based environments and leverages Cap IT Specs' expertise in AR systems and 3D modeling.

- Hakx Corp seeks AR solutions for immersive recruitment previews and skill assessments.
- The proposed solution includes AR job role visualizations, gamified skill evaluations, and virtual workplace tours.
- Deployment options are mobile devices, AR headsets, or web-based AR environments.
- Cap IT Specs offers expertise in enterprise-level AR systems and 3D modeling.

Clarifying questions

- Could you please specify the target number of users for the AR recruitment suite?
- What specific mobile devices and AR headsets are you anticipating support for?
- What are the key performance indicators (KPIs) you'd like to track through the analytics tools?
- Can you outline the desired timeline for development, testing, and deployment?
- What is the budget range allocated for this AR recruitment solution?
- What are the specific compliance requirements (e.g., data privacy, accessibility) that the AR solution must meet?
- What level of customization is anticipated for the 3D modeling and UI/UX elements?
- What is the expected frequency of system updates and ongoing support?
- Can you provide a detailed breakdown of the deliverables, including documentation and training materials?
